protein, strength, training, amino acids, hypertrophy, muscle, 65
psychological skills, adverse conditions, applied sport psychology, emotions, 886
psychological skills, structural equations, measurement, model testing, 803
psychological well-being, quality of life, ageing, cardiovascular, exercise, health promotion, musculoskeletal, 703
psychology, talent identification and development, dynamic, multidimensional, 395

quadriceps, adaptation, eccentric exercise, muscle damage, 1005
quality of life, ageing, cardiovascular, exercise, health promotion, musculoskeletal, psychological well-being, 703

rating of perceived exertion, short-term high-intensity exercise, ergogenic aids, preloaded exercise, 637
reaction time, additive factor method, arousal, cognitive-energetical model, critical flicker fusion, 419
reaction time, sprint start, timing, auditory signal, isometric force, 373
reactive oxygen species, antioxidants, exercise, oxidative stress, performance, 81
red cell mass, athletes, cardiovascular function, erythropoietin, hypoxic training, intermittent hypoxia, maximal oxygen uptake, 928
refereeing, decision-making skills, heart rate, 179
regional pre-cooling, anaerobic exercise, fatigue, hyperthermia, liquid conditioning garments, 605
rehydration, water balance, electrolyte balance, hypohydration, 57
reliability, coefficient of variation, elite athlete, gender, medal, 339
reliability, swimming, coefficient of variation, elite athletes, 613
repeated sprint ability, game analysis, movement patterns, 843
reproducibility, anchoring, children, perceived exertion, production, 159
reproduction, sport, biomarker, body composition, energy balance, exercise, 1
roles, team sport, interdependence, 429
rugby league, discriminant analysis, groin injuries, isokinetic, 629
rugby league, semi-professional, collision sport, football, performance, 409
running speed, whole blood lactate, adolescents, 215
running, sprinting, wind, aerodynamics, altitude, athletics, 1073
running, thermoregulation, cardiovascular fitness, exercise intensity, 1083

saliva flow rate, salivary IgA, stress hormones, α-amylase, circadian variation, 1015
salivary IgA, stress hormones, α-amylase, circadian variation, saliva flow rate, 1015
scouting, women, basketball, classification, disability, 668
sedentary behaviour, young people, determinants, exercise, health, interventions, physical activity, policy, 679
segmental organization, biomechanics, handball, overarm throwing, 439
semi-professional, collision sport, football, performance, rugby league, 409
shaft flexibility, junior golf, 457
short-term high-intensity exercise, ergogenic aids, preloaded exercise, rating of perceived exertion, 637
similarity, team sports, expertise, perception, 205
soccer, youth, applied sport psychology, barriers, consulting, perceptions, 813
social exclusion, sport, evaluation, physical activity, 727
sodium, carbohydrate, dehydration, fatigue, gastrointestinal function, hyperthermia, 39
sport, biomarker, body composition, energy balance, carbohydrate, energy intake, glycaemic index, glycogen, performance, 15
sport, evaluation, physical activity, social exclusion, 727
sports nutrition, composition, creatine, plasma, 851
sprint start, timing, auditory signal, isometric force, reaction time, 373
sprinting, wind, aerodynamics, altitude, athletics, running, 1073
steroid, sympatho-adrenal system, MHPG, mood, muscle soreness, 1025
stiffness, stress, coordination dynamics, damping, progression–regression hypothesis, 867
strength, training, amino acids, hypertrophy, muscle, protein, 65
stress hormones, α-amylase, circadian variation, saliva flow rate, salivary IgA, 1015
stress, coordination dynamics, damping, progression–regression hypothesis, stiffness, 867
string dampers, tennis, vibration, electromyography, grip force, 1041
structural equations, measurement, model testing, psychological skills, 803
Subjective Exercise Experience Scale, affect, duration, exercise, 621
supplementation, contractile function, delayed-onset muscle soreness, eccentric, protease, 365
sweating, acclimatization, dehydration, environmental temperature, hyperthermia, 917
swimming, coefficient of variation, elite athletes, reliability, 613
swimming, training, biomechanics, coordination, dynamic approach, 651
swimming, water polo, adolescents, athletes, physical ability, 347
sympatho-adrenal system, MHPG, mood, muscle soreness, steroid, 1025
systematic review, effectiveness, environment, health-enhancing physical activity, 755
systematic review, evaluation, intervention, physical activity, 741

talent identification and development, dynamic, multidimensional, psychology, 395
talent, field hockey, multidimensional performance characteristics, performance level, 1053
team sport, interdependence, roles, 429
team sports, expertise, perception, similarity, 205
telemark skiing, dry-land exercise, electromyography, kinematics, 357
tennis, vibration, electromyography, grip force, string dampers, 1041

testosterone, cortisol, endurance, muscle strength, power–velocity relationship, 465
thermoregulation, cardiovascular fitness, exercise intensity, running, 1083
thermoregulation, eccrine glands, lactic acid, 321
throwing, underspeed, accuracy, fast bowling, modified-implement training, overspeed, performance, 1035
time-zone transition, travel fatigue, jet lag, 946
timing, auditory signal, isometric force, reaction time, sprint start, 373
training, amino acids, hypertrophy, muscle, protein, strength, 65
training, biomechanics, coordination, dynamic approach, swimming, 651
training, caffeine, creatine, gene expression, muscle triacylglycerol, nutrition, 127
training, exercise, immunity, leucocytes, macronutrients, micronutrients, 115
transport, health-enhancing physical activity, policy, politics, 791
travel fatigue, jet lag, time-zone transition, 946

underspeed, accuracy, fast bowling, modified-implement training, overspeed, performance, throwing, 1035

vasoconstriction, adaptation, cold conditions, immersion, norepinephrine, 898
ventilation, breaststroke, kinematics, lactate, pacing, 149
ventricular hypertrophy, athletic heart, canoeists, echocardiography, 859
vibration, electromyography, grip force, string dampers, tennis, 1041

water balance, electrolyte balance, hypohydration, rehydration, 57
water polo, adolescents, athletes, physical ability, swimming, 347
weight reduction, creatine kinase, energy restriction, fat-free mass, judoist, muscle function, 329
wheelchair athletes, endurance, metabolic, physiological, 449
whole blood lactate, adolescents, running speed, 215
wind, aerodynamics, altitude, athletics, running, sprinting, 1073
women, basketball, classification, disability, scouting, 668

young people, determinants, exercise, health, interventions, physical activity, policy, sedentary behaviour, 679
youth, applied sport psychology, barriers, consulting, perceptions, soccer, 813
